MEASS00617 MTA057 Produce anodised film on aluminium alloy components

Release 1

MEASS00617 MTA057 Produce anodised film on aluminium alloy components

Modification History

Release 1. Skill set code changed. Description added. Units and codes updated. Supersedes and is equivalent to MEASS00404 MTA057 Produce anodised film on aluminium alloy components.

Description

This skill set reflects the skill requirements for individuals with allied trade qualifications who are employed in Civil Aviation Safety Regulations (CASR) Part 145 approved maintenance organisations (AMOs) and require approval to produce anodised film on aluminium alloy components.

Pathways Information

This skill set has been developed to assist in compliance with CASR Part 145. These units provide credit towards a range of MEA Aeroskills and MEM Metal and Engineering Training Package qualifications

Licensing/Regulatory Information

Nil

Skill Set Requirements

MEACOM0029	Conversion from allied trades for employment in aviation maintenance workshops*
MEA157	Complete aviation maintenance industry documentation
MEM08002	Pre-treat work for subsequent surface coating*
MEM08006	Produce clear and/or coloured and/or sealed anodised film on aluminium*

Units marked with an asterisk have prerequisites. See the unit or the MEA Aeroskills Companion Volume Information Guide for details

Target Group

This skill set is for individuals with allied trade qualifications who are employed in CASR Part 145 AMOs and require approval to produce anodised film on aluminium alloy components.

Suggested words for Statement of Attainment

These competencies from the MEA Aeroskills Training Package meet the requirements for employment of individuals with Certificate III or Certificate IV qualifications in an allied trade in aircraft component maintenance workshops on the production of anodised film on aluminium alloy components.
