Assessment Requirements for MEM12001

Use comparison and basic measuring devices

Release: 1

Assessment Requirements for MEM12001 Use comparison and basic measuring devices

Modification History

Release 1. Supersedes and is equivalent to MEM12001B Use comparison and basic measuring devices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting measurement requirements from specifications, including sketches and job instructions
- selecting appropriate basic measuring device to achieve the required outcome
- selecting appropriate comparison devices to achieve the required outcome
- obtaining measurements in a safe and effective manner in accordance with SOPs
- storing and maintaining measuring devices according to manufacturer's specifications or SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- use and application of various comparison and measurement devices
- procedures for the correct use of devices
- procedures for maintaining and storing devices.

Assessment Conditions

- Assessors must:
 - have vocational competency in using comparison and basic measuring devices at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
