Assessment Requirements for MEM19044 Repair and restore antique jewellery

Release: 1

Assessment Requirements for MEM19044 Repair and restore antique jewellery

Modification History

Release 1. Supersedes and is equivalent to MEM19044A Repair and restore antique jewellery.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- analysing the characteristics of the antique jewellery and materials used
- determining the repair or restoration work
- determining the repair or restoration techniques on at least two occasions
- costing work and confirming feasibility of repair work to achieve quality outcomes with the client
- selecting and using appropriate materials, tools, equipment and repair techniques on at least two occasions to ensure quality standards and client requirements are met
- checking completed work meets client requirements
- identifying and rectifying problems or quality issues
- completing all documentation in accordance with procedures.

Note: Where a volume and/or frequency is not specified, demonstration must be provided at least once.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- information sources on antique jewellery
- range of techniques used in antique jewellery construction
- reasons for repair and restoration work on antique jewellery
- repair and restoration techniques used for antique jewellery
- characteristics and responses of metals and common materials used in antique jewellery
- reasons for selecting particular metals, construction methods, repair, manufacturing and finishing techniques
- procedures for identifying problems or poor-quality outcomes
- actions to be taken when work does not meet specifications
- environmental considerations for repair and restoration of antique jewellery.

-

Assessment Conditions

- Assessors must:
 - have vocational competency in repairing and restoring antique jewellery at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Where possible, assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task
- skills, task management skills, contingency management skills and job role environment skills.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
