Assessment Requirements for MEM19065 Obtain rough and polished gemstones

Release: 1

Assessment Requirements for MEM19065 Obtain rough and polished gemstones

Modification History

Release 1. New unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- following standard operating procedures (SOPs) and complying with work health and safety (WHS) requirements at all times
- researching the current market for cut and polished gemstones
- obtaining polished gemstones for an identified market segment on at least two occasions in accordance with accepted methods, procedures, protocols and ethics
- obtaining rough gemstones for an identified market segment on at least two occasions in accordance with accepted methods, procedures, protocols and ethics.

Note: Where a volume and/or frequency is not specified, demonstration must be provided at least once.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- markets for cut and polished gemstones
- sources and methods for obtaining gemstones including the advantages and disadvantages of using each source
- accepted methods, procedures, protocols and ethics that apply to buying gemstones
- benefits and drawbacks of buying parcels of classed gemstones (whole or part) compared with buying single rough gemstones.
-

Assessment Conditions

- Assessors must:
 - have vocational competency in obtaining gemstones at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.

- Where possible, assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
