MEM24008 Perform ultrasonic testing

Release: 1

MEM24008 Perform ultrasonic testing

Modification History

Release 1. Supersedes and is equivalent to MEM24008B Perform ultrasonic testing.

Application

This unit of competency defines the skills and knowledge required to operate ultrasonic testing equipment in a range of industrial applications including fabrications, structures and components across a wide range of industries to Level 2 (AS 3669 Non-destructive testing — Qualification and approval of personnel — Aerospace and AS ISO 9712 Non-destructive testing — Qualification and certification of NDT personnel) or equivalent.

Ultrasonic tests are performed on critical component or structural zones. Re-assessment of competency may be required at regular intervals in accordance with Australian Standards or other relevant standards. Actual and potential defects are to be considered, together with ongoing abnormalities.

Materials and chemicals which are subject to codes and regulations - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - are subject to safe work habits and must be stored and used in accordance with safe work practices.

Where interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools are required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing or legislative requirements apply to this unit at the time of publication. Certification against Australian Standards may be achieved where assessment in this unit of competency is carried out in conjunction with an examining authority as described in AS ISO 9712 Non-destructive testing — Qualification and certification of NDT personnel.

Band: B

Unit Weight: 6

Pre-requisite Unit

MEM11011 Undertake manual handling

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information

MEM18001 Use hand tools

MEM24012 Apply metallurgical principles

Competency Field

Non-destructive testing

Unit Sector

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine job requirements	1.1 Follow standard operating procedures (SOPs) 1.2 Comply with work health and safety (WHS) requirements at all times 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs 1.4 Identify job requirements from specifications
2. Prepare inspection areas for ultrasonic testing	2.1 Identify inspection areas and clean and prepare for testing using appropriate procedures and materials 2.2 Carry out preparation processes in accordance with the relevant procedures and statutory requirements 2.3 Assess inspection areas visually and identify obvious discontinuities
3. Perform tests	3.1 Select the most appropriate ultrasonic test for the material and/or application 3.2 Select testing equipment and prepare in accordance with standards and/or procedures 3.3 Carry out ultrasonic test in accordance with relevant standards and specifications 3.4 Check ultrasonic testing equipment for defects, and maintain and store in accordance with procedures and manufacturer instructions
4. Interpret and report the results of ultrasonic test(s)	4.1 Assess indications, detect defects and classify in accordance with national and international codes and standards 4.2 Confirm defects in accordance with organisational procedures and industry practices 4.3 Report test results including an accurate identification of location and size of discontinuities in accordance with organisational procedures, accepted industry practices and customer service requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Defects include one or more of the following:

- corrosion
- metal fatigue
- deformation in nonferrous, ferrous alloys and steels
- composite materials
- fatigue cracks
- stress corrosion cracking
- manufacturing defects
- thickness measurement and fit
- mechanical and bonded repairs
- laminar tearing
- welding defects
- casting defects
- aircraft components.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM24008B Perform ultrasonic testing.
