Assessment Requirements for MEM26020

Identify and interpret required standards for composites

Release: 1

Assessment Requirements for MEM26020 Identify and interpret required standards for composites

Modification History

Release 1. Supersedes and is equivalent to MEM26020A Identify and interpret required standards for composites

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications, formulas/recipes and batch sheets for identifying and interpreting required standards for composites
- considering all reasonably standards when selecting and choosing the appropriate standard
- undertaking required work and monitoring production to ensure it complies with the procedures
- identifying areas for improvement and taking appropriate action
- completing all documentation and reports, including items requiring further action, in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- the hierarchy of standards vs guidance vs voluntary codes
- relevant standards
- interpretation of standards
- evidence to support meeting of standard
- accessing standards
- copyright of Australian Standards
- using standards.

Assessment Conditions

- Assessors must:
 - have vocational competency in identifying and interpreting required standards for composites at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
