MSASS00004 Leading Hand/Supervisor

Release: 3

MSASS00004 Leading Hand/Supervisor

Modification History

Release 3 - MSACM unit updated in unit grid. No change to outcomes.

Release 2 - MSACM unit replaced by MSS unit from MSS11v2 Sustainability Training Package.

Description

The Skill Set below has been developed in consultation with the industry and is based on a logical cluster of units which meet critical industry needs in the area of supervision and safety. The Skill Set consists of a cluster of competencies which are commonly practiced (and possibly trained) together. It reflects an industry need to be able to recognise that a person can undertake this defined role.

Pathways Information

These competencies can provide credit towards relevant qualifications in all MSA training packages.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Units:

MSAPMOPS212A Use enterprise computer or data systems

MSAPMOHS300A Facilitate the implementation of OHS for a work group

MSS403011A Facilitate implementation of competitive systems and practices

TAEDEL301A Provide work skill instruction

Target Group

Entrants to the Leading Hand/Supervisor Skill Set will be required to have completed a Certificate III qualification in a manufacturing related area, or equivalent. This Skill Set addresses the need for coordination and supervision of trainees, apprentices and other production staff to ensure work place safety, quality and production requirements are maintained and monitored.

Suggested words for Statement of Attainment

These competencies from the MSA07 Manufacturing and other Training Packages meet the minimum industry requirements for supervision of staff working in a manufacturing environment
