Modification History

Not applicable.

Description

Not applicable.

Pathways Information

Pathway

These competencies can provide credit towards qualifications within the Manufacturing Training Package. If verifiers seek employment as trade measurement inspectors, these competencies may provide recognition towards the Certificate IV in Government (Trade Measurement).

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Units

- MSATMVER302A Verify a simple measuring instrument
- MSATMREF301A Use and maintain reference standards.
-

Target Group

Target group

This Skill Set is appropriate for experienced personnel such as quality assurance technicians, instrument manufacturers or importers and software developers who wish to work under a servicing licence to verify simple measuring instruments used in trade measurement.

Examples of simple measuring instruments include, beverage measuring instruments, protein measuring instruments, length measuring instruments, area measuring instruments' dimensional measuring instruments, vehicle tanks and milk tanks.

This Skill Set reflects the minimum requirements for licensing. However, the regulator or individual traders may impose additional requirements before a verifier can start work on some sites. Entrants to this Skill Set should have sufficient workplace skills in OH&S, communication and teamwork that provide underpinning competency to acquire and apply the Skill Set.

Suggested words for Statement of Attainment

Suggested words for Statement of Attainment

These competencies are taken from the Manufacturing Training Package and provide training that meets the minimum requirements for licensing as a verifier of a simple measuring instrument.
