# **MSASS00011 Trade Measurement Verification (Simple Measure)**

**Release 1**

## **MSASS00011 Trade Measurement Verification (Simple Measure)**

### **Modification History**

Release 1 (reinstated)

### **Description**

Not applicable.

### **Pathways Information**

These competencies can provide credit towards qualifications within the Manufacturing Training Package. If verifiers seek employment as trade measurement inspectors, these competencies may provide recognition towards the new Certificate IV in Government (Trade Measurement).

### **Licensing/Regulatory Information**

Not applicable.

### **Skill Set Requirements**

#### *Units*

- MSATMVER301A Verify simple measures
- MSATMREF301A Use and maintain reference standards

## **Target Group**

This Skill Set is appropriate for experienced personnel such as instrument manufacturers or importers who wish to work under a servicing licence to verify simple measures used in trade measurement. Examples of simple measures include, length measures, alcoholic beverage measures, lubricating oil measures, graduated measures and trade masses in the range 1 mg to 20 kg.

This Skill Set reflects the minimum requirements for licensing. However, the regulator or individual traders may impose additional requirements before a verifier can start work on some sites. Entrants to this Skill Set should have sufficient workplace skills in OH&S, communication and teamwork that provide underpinning competency to acquire and apply the Skill Set.

## **Suggested words for Statement of Attainment**

These competencies are taken from the Manufacturing Training Package and provide training that meets the minimum requirements for licensing as a verifier of simple measures.

## **Custom Content Section**

Not applicable.
