Qualification Description

This qualification describes the skills and knowledge required to perform the manufacture of free-standing furniture or built-in cabinets, and provide on-site assistance in the installation of furniture or cabinets involving known routines and procedures and some accountability for the quality of outcomes. It reflects vocational outcomes for those performing assistant cabinet maker, assistant installer of built-in cabinets, and production operator within a cabinet making enterprise. Cabinets include free-standing and built-in furniture or fitted cabinets, such as those used in kitchens and bathrooms. Skills are also included that cover assisting in the installation or renovation of kitchens and bathrooms and other fitted cabinets, which involves collaboration with others through members of a group or team. This qualification does not cover shopfitting.

Meaningful involvement of industry is essential to achieving this qualification outcome.

This qualification is suitable for persons employed in furniture making as described above. It also applies to persons who are formally engaged in a traineeship in accordance with the Australian Apprenticeships policy. The MSF20516 Certificate II in Furniture Making Pathways is the appropriate qualification for VET delivered to secondary students.

There are no specific licences that relate to this qualification. However, depending on the state and territory where work is undertaken licensing may relate to this qualification where the candidate is required to work on-site. The licensing requirement will usually involve construction induction training. Where licensing is required the unit CPCWHS1001 - Prepare to work safely in the construction industry should be selected. If no licensing requirement exists (e.g. where all work will be off-site) then the unit MSMWHS200 Work safely should be selected
