Qualification Description

This qualification reflects the role of individuals who design kitchens and bathrooms that typically feature built-in cabinetry and furniture. They may work in larger organisations or as independent designers.

Designers work directly with the client and/or with professionals, such as architects, builders, retailers, interior designers and suppliers. They possess a broad range of specialised and technical knowledge and skills, and they research and compare information from diverse sources to develop design solutions. They also use well-developed communication skills and may provide some leadership and guidance to others.

There are no specific licences that relate to this qualification. Work may require access to construction sites and require White Card construction induction training and certification covered by the unit CPCWHS1001 Prepare to work safely in the construction industry. Local regulations should also be checked for requirements.

Entry Requirements

There are no entry requirements for this qualification.
