Assessment Requirements for MSFFDT5014 Investigate legal requirements for design

Release: 1

Assessment Requirements for MSFFDT5014 Investigate legal requirements for design

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret and analyse legal documentation and industry standards
- Investigate legal requirements for design and for the protection and efficient operation of the enterprise, ensuring all relevant legal requirements are in place
- Produce reports on the legal requirements for a design business
- Use communication tools, such as computers, internet, email and databases
- Lead others and work effectively to improve production quality and outcomes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity and encourage participation of employees in the planning of work activities and changes

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to investigating legal requirements for design
- Organisational and site standards, requirements, policies and procedures for investigating legal requirements for design
- Business and operational legal requirements
- Relevant computer programs
- Procedures for the recording, reporting and maintenance of workplace records and information
- Environmental protection requirements
- Established communication channels and protocols
- Relevant problem identification and resolution

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to resources for investigating legal requirements for design.
