MSFFL2012 Select, operate and maintain shot blasting equipment

Release: 1

MSFFL2012 Select, operate and maintain shot blasting equipment

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers selecting, operating and maintaining shot blasting equipment in applications relating to floor preparation.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

Pre-requisite Unit

Unit Sector

Flooring technology

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify shot blasting equipment	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to the use of shot blasting equipment are verified and complied with
		1.2	Types of shot blasting equipment and their functions are identified from relevant information sources
		1.3	Instructions and/or plans are read and interpreted to identify the process required to complete work tasks
2	Select shot blasting equipment	2.1	Shot blasting equipment and shot size are selected consistent with the needs of the job
		2.2	Shot blasting equipment is checked for serviceability

- and safety and any faults are corrected or processed for repair
- | | | | |
|---|-----------------------------|-----|--|
| 3 | Clean and prepare sub-floor | 3.1 | Appropriate personal protective equipment is selected, correctly fitted and used |
| | | 3.2 | Fittings and fixtures are removed from the sub-floor |
| | | 3.3 | Sub-floor is cleared of loose debris and dirt, and cleaned |
| 4 | Shot blast the floor | 4.1 | Work sequence and starting point are selected |
| | | 4.2 | Perimeter is shot blasted using light equipment and appropriate cutter |
| | | 4.3 | Main area is shot blasted to the required standard using the most appropriate available equipment in accordance with manufacturer specifications |
| | | 4.4 | Floor area is cleaned, inspected and re-worked as required |
| 5 | Complete housekeeping | 5.1 | Tools and equipment are cleaned and stored appropriately |
| | | 5.2 | Work area is cleaned and rubbish disposed of appropriately |
| | | 5.3 | Workplace documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.
