**Release: 1**

# MSFFL2018 Install unpatterned tufted and bonded carpet floor coverings

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers installing unpatterned tufted and bonded carpet floor coverings, including preparing, cutting, laying out, joining, power stretching, trimming and finishing, using the carpet gripper installation system.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

## Competency Field

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

|   |                          |     |                                                                                                                                                                                                          |
|---|--------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Prepare for installation | 1.1 | Applicable work health and safety (WHS), legislative and organisational requirements relevant to the installation of unpatterned tufted and bonded carpet floor coverings are verified and complied with |
|   |                          | 1.2 | Instructions and/or plans/sketchers are read and interpreted to identify the process required to complete work tasks                                                                                     |
|   |                          | 1.3 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition                                               |

|   |                       |     |                                                                                                             |
|---|-----------------------|-----|-------------------------------------------------------------------------------------------------------------|
|   |                       | 1.4 | Sequence of work is planned, including the starting point, to ensure efficiency and quality of installation |
| 2 | Set out materials     | 2.1 | Carpet to be installed is checked against order                                                             |
|   |                       | 2.2 | Carpet is acclimatised according to manufacturer recommendations                                            |
|   |                       | 2.3 | Underlay and gripper strips are inspected to confirm correct fitting                                        |
|   |                       | 2.4 | Work area is cleared of scraps or other contaminants                                                        |
| 3 | Lay carpet            | 3.1 | Instructions and sequence for laying and fixing are followed                                                |
|   |                       | 3.2 | Carpet pieces are laid out and checked for size, direction of pile match                                    |
|   |                       | 3.3 | Carpet pieces are cut, sealed and joined                                                                    |
|   |                       | 3.4 | Stretching and fixing methods are used following manufacturer instructions and Australian Standards         |
|   |                       | 3.5 | Finished work is inspected for compliance with work order, workplace and Australian Standards of finish     |
| 4 | Complete housekeeping | 4.1 | Unused materials are stored or recycled as required                                                         |
|   |                       | 4.2 | Tools and equipment are cleaned and stored appropriately                                                    |
|   |                       | 4.3 | Work area is cleaned and rubbish disposed of appropriately                                                  |
|   |                       | 4.4 | Workplace documentation is completed                                                                        |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

# Assessment Requirements for MSFFL2018 Install unpatterned tufted and bonded carpet floor coverings

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Complete a minimum of:
  - one (1) installation of tufted carpet
  - one (1) installation of bonded carpet using a carpet gripper installation system to connecting rooms, including at least one seam join and one cross join
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to installing unpatterned tufted and bonded carpet floor coverings
- Organisational and site standards, requirements, policies and procedures for installing unpatterned tufted and bonded carpet floor coverings
- Environmental protection requirements
- Established communication channels and protocols
- Relevant problem identification and resolution
- Types of tools and equipment and procedures for their safe use, operation and maintenance
- Characteristics of materials, products and defects
- Set-up and operation of equipment

- Products assembly techniques
- Procedures for the recording, reporting and maintenance of workplace records and information
- Appropriate mathematical procedures for estimation and measurement
- Type, characteristics, uses and limitations of tufted and bonded carpets
- Types and uses of carpet installation tools, equipment and materials
- Techniques for joining and stretching carpet
- Workplace safety system requirements related to carpet gripper installation systems
- Characteristics and requirements of soft underlays, gripper strips and metal mouldings
- Work flow in relation to preparation, layout, stretching, cutting and finishing of carpet

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials, equipment and specifications relevant to installing tufted and fusion bonded carpet using the carpet gripper installation system.
