MSFFL3018 Install resilient sheet to bench and counter tops

Release: 1

MSFFL3018 Install resilient sheet to bench and counter tops

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers installing resilient sheet to bench and counter tops.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

Pre-requisite Unit

Competency Field

Unit Sector

Flooring technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|------------------------------------|-----|--|
| 1 | Prepare materials for installation | 1.1 | Applicable work health and safety (WHS), legislative and organisational requirements relevant to installing resilient sheet to bench and counter tops are verified and complied with |
| | | 1.2 | Instructions and/or plans are read and interpreted to identify process required to complete work tasks |
| | | 1.3 | Substrate condition is assessed for suitability for installation of resilient sheet to the bench/counter top |
| | | 1.4 | Suitable adhesives, trims and accessories are selected |
| | | 1.5 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the |

		work, serviceable and in a safe condition
	1.6	Sequence of work is planned, including the starting point, to ensure efficiency and quality of installation
	1.7	The aesthetics of the materials is maximised where appropriate, matching grains, colours and patterns
2	Set out materials	2.1 Resilient sheets to be installed are checked against work order
		2.2 Resilient sheets are acclimatised according to manufacturer recommendations
		2.3 Resilient sheets for fixing are organised and used in accordance with relevant safety management requirements
		2.4 Working lines and starting point are established
		2.5 Pre-form fillet is cut and fitted, if required
		2.6 Feathering systems and applications are prepared and applied in accordance with the installation plan
3	Install resilient sheet	3.1 Instructions and sequence for laying and fixing is followed
		3.2 Resilient sheets are laid out to meet directional sequence, pattern match, specification requirements, and to minimise waste and joins as appropriate
		3.3 The aesthetics of the materials is maximised, where appropriate, matching grains, colours and patterns
		3.4 Pattern templates of the bench/counter tops are produced, if required
		3.5 Resilient sheets are accurately and clearly marked for cutting
		3.6 Resilient sheets are cut to required pattern and shape with minimum waste of materials, allowing for final adjustment, trimming and welding processes
		3.7 Header and/or perimeter contact adhesive is applied to surfaces
		3.8 Resilient sheets are positioned in accordance with the plan, pressed out and hand-rolled

- 3.9 Resilient sheet is heated to form required profiles
 - 3.10 Seams are prepared and welded in accordance with the plan, manufacturer instructions and industry standards
 - 3.11 Joins and/or seams are trimmed and finished to industry standards
 - 3.12 Completed installation is checked for flaws in installation and materials and faults rectified following workplace procedures
- 4 Complete housekeeping
- 4.1 Unused materials are stored or recycled as required
 - 4.2 Tools and equipment are cleaned and stored appropriately
 - 4.3 Work area is cleaned and rubbish disposed of appropriately
 - 4.4 Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|-------------------------------------|---|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individual to demonstrate some discretion, judgement and problem solving |
| Resilient sheets include: | <ul style="list-style-type: none">• homogeneous/heterogeneous• linoleum sheet• encapsulated glass fibre• inlaid• rotogravure |
| Adhesives include: | <ul style="list-style-type: none">• acrylic adhesives• water and solvent-based contacts recommended by manufacturers |
| Tools and equipment include: | <ul style="list-style-type: none">• flat trowel• notched trowel• pencil• wall roller• hand roller• cove and corner roller• recess scribe• reverse recess scribes• hook and straight knife• chalk-line |

- spirit level
 - tape measure
 - water level
 - laser level
 - height gauge
 - contact bucket/tray/roller and brushes
- Materials include:**
- resilient sheet
 - skirting
 - reducing and edge strips
 - welding rod
 - coving accessories
 - tapes
 - pattern paper
 - fillers
 - adhesives
- Feathering systems include:**
- the fitment of PVC edge fillet diminishing strip and the use of pre-mixed or mixed cementitious compounds
- Welding includes:**
- rod welding
 - self welding
 - fusion
- Profiles include:**
- internal and external angles
 - bullnoses
 - coves
 - profiling to pipe work
- Trimmed and finished includes:**
- trimming weld rod
 - abrading and fusing external corners
 - chemically finishing to industry standards and manufacturer specifications
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
 - work instructions, including job sheets, cutting lists, plans, drawings and designs
 - workplace procedures relating to reporting and communication
 - manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFL3307A Install resilient sheet to bench and counter tops
