MSFFL3019 Install anti-static resilient floor coverings

Release: 1

MSFFL3019 Install anti-static resilient floor coverings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers installing anti-static resilient floor coverings, including preparation, cutting, laying and fixing.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

Pre-requisite Unit

Competency Field

Unit Sector

Flooring technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Prepare for installation	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to installing anti-static resilient floor coverings are verified and complied with
		1.2	Instructions and/or plans are read and interpreted to identify the process required to complete work tasks
		1.3	Sub-floor condition is assessed for suitability for installation of anti-static resilient floor covering
		1.4	Suitable adhesives, trims and accessories are selected, if required

- | | | | |
|---|------------------------------------|-----|--|
| | | 1.5 | Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition |
| | | 1.6 | Sequence of work is planned, including the starting point, to ensure efficiency and quality of installation |
| 2 | Set out materials | 2.1 | Anti-static resilient floor covering to be installed is checked against order |
| | | 2.2 | Anti-static resilient floor coverings are acclimatised according to manufacturer recommendations |
| | | 2.3 | Anti-static resilient floor coverings are organised and used in accordance with relevant safety management requirements |
| | | 2.4 | Working lines and starting point are established |
| 3 | Lay anti-static resilient flooring | 3.1 | Instructions and sequence for laying and fixing are followed |
| | | 3.2 | Anti-static resilient floor coverings are laid out to meet directional sequence, pattern match, specification requirements, and to minimise waste and joins as appropriate |
| | | 3.3 | Anti-static resilient flooring materials are accurately and clearly marked for cutting |
| | | 3.4 | Anti-static resilient flooring materials are cut to required shape ensuring minimum waste |
| | | 3.5 | Adhesives and edge strips/accessories are prepared for use as required |
| | | 3.6 | Anti-static resilient floor coverings for fixing are organised and used in accordance with relevant safety management requirements |
| | | 3.7 | Anti-static resilient floor covering is laid and fixed to meet job specifications |
| | | 3.8 | Anti-static resilient floor covering fixing methods and equipment are used following manufacturer recommendations |
| | | 3.9 | Completed installation is checked for flaws in installation and materials and faults rectified following |

- workplace procedures
- | | | | |
|---|-----------------------|-----|--|
| 4 | Complete housekeeping | 4.1 | Unused materials are stored or recycled as required |
| | | 4.2 | Tools and equipment are cleaned and stored appropriately |
| | | 4.3 | Work area is cleaned and rubbish disposed of appropriately |
| | | 4.4 | Workplace documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|---|---|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individual to demonstrate some discretion, judgement and problem solving |
| Anti-static resilient floor coverings include: | <ul style="list-style-type: none">• resilient flooring with a resistance rating from 108 to 1010 ohms |
| Adhesives include: | <ul style="list-style-type: none">• acrylic• conductive acrylic |
| Tools and equipment include: | <ul style="list-style-type: none">• utility knife• straight edge• square• chalk and chalk-line• tape measure• hacksaw• serrated trowel• hammer• seam and edge trimmer• recess scribe• scribing bar• welding gun and accessories• grooving tool• straight edge |

	• divider • hand roller • gas bottle and gun • rubber mallet • paint brush and bucket • spatula knife • dividers • builders pencil • contact bucket • brush and roller • linoleum trolley
Materials include:	• anti-static resilient flooring materials • trims and accessories • tapes • adhesives
Personal protective equipment includes:	• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	• workplace procedures relating to the use of tools and equipment • work instructions, including job sheets, cutting lists, plans, drawings and designs • workplace procedures relating to reporting and communication • manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFL3308A Install anti-static resilient floor coverings
