MSFFL3020 Install conductive resilient floor coverings

Release: 1

MSFFL3020 Install conductive resilient floor coverings

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers installing conductive resilient floor coverings, including preparation, cutting, laying and fixing.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

Pre-requisite Unit

Competency Field

Unit Sector

Flooring technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Prepare for installation	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to installing conductive resilient floor coverings are verified and complied with
		1.2	Instructions and/or plans are read and interpreted to identify the process required to complete work tasks
		1.3	Sub-floor condition is assessed for suitability for installation of conductive resilient floor coverings
		1.4	Suitable adhesives, trims and accessories are selected
		1.5	Tools, equipment and materials are selected and checked

			prior to use, to ensure that they are appropriate for the work, serviceable and in a safe condition
		1.6	Sequence of work is planned, including the starting point, to ensure efficiency and quality of installation
		1.7	Materials are laid out to meet pattern and specification requirements, and minimise waste and joins
2	Set out materials	2.1	Conductive resilient floor coverings to be installed are checked against work order
		2.2	Conductive resilient floor coverings are acclimatised according to manufacturer recommendations
		2.3	Conductive resilient floor coverings for fixing are organised and used in accordance with relevant safety management requirements
		2.4	Working lines and starting point are established
3	Lay conductive resilient flooring	3.1	Instructions and sequence for laying and fixing are followed
		3.2	Copper grid and isolating layer are installed to specification
		3.3	Conductive resilient floor coverings are laid out to meet directional sequence, pattern match, specification requirements, and to minimise waste and joins as appropriate
		3.4	Conductive resilient floor coverings are accurately and clearly marked for cutting
		3.5	Conductive resilient floor coverings are cut to required pattern and shape with minimum waste of materials
		3.6	Conductive resilient floor coverings for welding and fixing are organised and used in accordance with relevant safety management requirements
		3.7	Welding and fixing methods and equipment are used following manufacturer instructions
		3.8	Conductive resilient floor covering is laid and fixed to meet job specifications
		3.9	Vinyl skirting, reducer and edge strips are set out and installed, as required

- | | | | |
|---|-----------------------|------|---|
| | | 3.10 | Completed installation is checked for flaws in installation and materials and faults rectified following workplace procedures |
| 4 | Complete housekeeping | 4.1 | Unused materials are stored or recycled as required |
| | | 4.2 | Tools and equipment are cleaned and stored appropriately |
| | | 4.3 | Work area is cleaned and rubbish disposed of appropriately |
| | | 4.4 | Workplace documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|--|--|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate some discretion, judgement and problem solving |
| Conductive resilient floor coverings include: | <ul style="list-style-type: none">• static conductive covering with a resistance reading of 10 4 to 10 8 using a copper grid and isolating layer |
| Adhesives include: | <ul style="list-style-type: none">• conductive adhesives |
| Tools and equipment include: | <ul style="list-style-type: none">• utility knife (with hook, straight and concave blades)• straight edge• square• chalk and chalk-line• tape measure• hacksaw• serrated trowel• hammer• seam and edge trimmer• recess scribe• scribing bar• welding gun and accessories• grooving tool• divider |

	• hand roller • exacto knife • roller (65 kg) • gas bottle and gun • rubber mallet • paint brush and bucket • spatula knife • dividers • builders pencil • contact bucket • brush and roller • linoleum trolley
Materials include:	• conductive resilient flooring • trims and accessories • adhesives • copper earthing strips
Personal protective equipment includes:	• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	• workplace procedures relating to the use of tools and equipment • work instructions, including job sheets, cutting lists, plans, drawings and designs • workplace procedures relating to reporting and communication • manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFL3309A Install conductive resilient floor coverings
