Assessment Requirements for MSFFL3076 Mix and apply high-build decorative resin flooring systems

Release: 1

Assessment Requirements for MSFFL3076 Mix and apply high-build decorative resin flooring systems

Modification History

Release 1. New unit.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied 3 separate high-build decorative resin flooring systems in accordance with job requirements:
 - 1 to an area of at least 10m²
 - 1 to an area of more than 10m²
 - 1 to an area of more than 20m².
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory legislation, regulations, standards and codes of practice, including individual technician rights and obligations relating to:
 - workplace health and safety
 - consumer law
 - environmental protection and sustainable use of materials
- how to access supplier instructions
- types, characteristics, uses and limitations of high-build decorative flooring systems
- mathematical procedures for estimation and measurement, including calculation of area and use of ratios for mixing
- types, uses and limitations of tools and equipment used in high-build decorative applications
- characteristics and requirements of suitable substrate preparation, including different methods and products used to profile, repair, prime and clean
- the features and layout of an effective mixing area
- taping techniques to protect surfaces that aren't to be coated, including walls, edges, transitions and boundaries on the floor
- personal protective equipment (PPE) and correct usage
- techniques for the following, the types of problems that may occur and how to avoid and respond:
 - measuring out and mixing high-build flooring systems, including pigment, fillers and stir-in additives

- applying high-build decorative flooring systems, including cutting in, brushing, spreading with a squeegee, rolling and pigment blending/manipulation
- characteristics and requirements of suitable preparation between coats
- quality indicators for finished flooring system
- cleaning and storage procedures for PPE, tools, equipment and unused materials
- disposal procedures for waste materials
- requirements and protocols for recording, reporting and maintaining workplace records and information.
-

Assessment Conditions

The following aspects of the Performance Evidence must have been demonstrated and directly observed by the assessor in the workplace or in a simulated environment that reflects workplace conditions and contingencies:

- application of high-build decorative resin flooring system to an area of at least 10m².

Remaining aspects of the Performance Evidence may be demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies but there is no requirement for direct observation by the assessor.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - locations requiring high-build decorative flooring applications
 - work orders
 - tools and equipment to complete tasks in the Performance Evidence, including safety and personal protective equipment
 - workplace procedures.

The assessor must directly observe the mixing and application of the flooring system to a complete area of at least 10m².

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
