# **MSFFM3018 Set up, operate and maintain mechanical wood-turning lathes**

Release: 1

# MSFFM3018 Set up, operate and maintain mechanical wood-turning lathes

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers setting up, operating and maintaining mechanical wood-turning lathes used in the production of furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture Making

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                    |                                                                                                                              |
|--------------------|------------------------------------------------------------------------------------------------------------------------------|
| 1 Prepare for work | 1.1 Work instructions are used to determine job requirements, including design, quality, materials, equipment and quantities |
|                    | 1.2 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work         |
|                    | 1.3 Material for turning is selected and inspected for quality                                                               |
|                    | 1.4 Machines, cutting tools and templates are identified and checked for safe and effective operation                        |
|                    | 1.5 Procedures are determined for minimising waste material                                                                  |
|                    | 1.6 Procedures are identified for maximising energy efficiency while completing the job                                      |

- |   |                                           |     |                                                                                                                                                                       |
|---|-------------------------------------------|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2 | Set up machines                           | 2.1 | Machine settings and adjustments are made in accordance with job requirements and machine and tool manufacturer instructions                                          |
|   |                                           | 2.2 | Trial runs are conducted to check machine operation, accuracy and quality of finished work                                                                            |
|   |                                           | 2.3 | Necessary adjustments are made to machine settings                                                                                                                    |
| 3 | Operate machines                          | 3.1 | Machine start-up procedure is carried out in accordance with manufacturer instructions                                                                                |
|   |                                           | 3.2 | Material is fed into machine in accordance with manufacturer instructions, tooling requirements, safe handling procedures and standard workplace operating procedures |
|   |                                           | 3.3 | Machine is operated in accordance with its designed capacity and purpose, and to manufacturer recommendations                                                         |
|   |                                           | 3.4 | Machine operation is monitored to ensure product quality and output                                                                                                   |
|   |                                           | 3.5 | Waste quantities are checked and minimised                                                                                                                            |
|   |                                           | 3.6 | Items that do not meet quality requirements are repaired, recycled or discarded according to workplace procedures                                                     |
|   |                                           | 3.7 | Problems with the required work and/or the operation of the machine are identified and reported to appropriate persons                                                |
| 4 | Finalise operation and maintain equipment | 4.1 | Work area is cleaned, hand and/or power tools and equipment are cleaned, maintained and stored in accordance with workplace procedures                                |
|   |                                           | 4.2 | Machinery is cleaned and left in a safe mode                                                                                                                          |
|   |                                           | 4.3 | Faulty and/or defective equipment is tagged and reported in accordance with workplace practices                                                                       |
|   |                                           | 4.4 | Unused hardware is collected and stored for re-use or disposal following workplace procedures                                                                         |
|   |                                           | 4.5 | Waste and scrap materials are dealt with following workplace procedures                                                                                               |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- |                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
