Assessment Requirements for MSFFP2001 Undertake a basic furniture making project

Release: 1

Assessment Requirements for MSFFP2001 Undertake a basic furniture making project

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- following work instructions, procedures and safe work practices
- applying safe handling requirements for equipment, products and materials, including the use of PPE
- selecting furnishing materials for the project
- selecting furnishing components for the project
- determining appropriate joining methods for furnishing materials and components
- producing drawings of an assembled project and its components
- planning the manufacture of a furnishing project, including all necessary calculations
- producing components according to created drawing requirements
- assembling project, including using tools and equipment in a safe and effective manner
- inspecting finished project against quality requirements
- tidying/cleaning work area as appropriate
- returning tools, equipment and project items to designated storage areas and/or conditions.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures in a furniture making environment and use of PPE
- sources of information on furnishing materials and components
- sources of information on furnishing projects
- furnishing drawing practices
- methods of joining timber and engineered board
- need for drawings that others can follow.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator

- have vocational competency in undertaking a basic furniture making project at least to the level being assessed with relevant industry knowledge and experience.
- Assessment must occur in a sufficiently rigorous simulated environment that reflects realistic workplace situations.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required to complete the project.
- Project should include the use of a number of materials, tools, joining methods and complexity expected of a learner entering the furnishing industry.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
