Assessment Requirements for MSFFP2005 Join furnishing materials

Release: 1

Assessment Requirements for MSFFP2005 Join furnishing materials

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- following work instructions, procedures and safe work practices
- identifying and interpreting project sheets, specifications, drawings and other relevant information in joining furnishing materials
- applying safe handling requirements for equipment, products and materials, including the use of PPE
- identifying and selecting materials and joining methods to be used in the work process
- using mathematical ideas and techniques to complete measurements, including calculating area and estimating material requirements
- using tools and equipment in a safe and effective manner
- joining a minimum of the following:
 - two (2) timber products – one (1) hardwood and one (1) softwood and
 - one (1) composite product
- inspecting finished product against quality requirements
- minimising wastage of resources, including materials, time and money
- communicating and working effectively and safely with others.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of PPE
- types, characteristics, uses and limitations of timbers, composite and plastic materials
- joining techniques and their effect on materials
- types of joining methods and the impact of these on joining materials
- preparation of drawings/set-outs
- identification of hand and/or power tools, materials, equipment, processes and procedures
- sequences in relation to joining materials.

Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator
- have vocational competency in joining furnishing materials at least to the level being assessed with relevant industry knowledge and experience
- Assessment must occur in a sufficiently rigorous simulated environment that reflects realistic workplace situations.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
