Assessment Requirements for MSFFP2008

Make a simple upholstery product

Release: 1

Assessment Requirements for MSFFP2008 Make a simple upholstery product

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- following work instructions, procedures and safe work practices
- identifying and interpreting project sheets, specifications, drawings and other relevant information in making simple upholstery products
- applying safe handling requirements for equipment, products and materials, including the use of PPE
- selecting appropriate fabrics for the furniture item and appropriate foundations
- using mathematical ideas and techniques to complete measurements, including calculating area and estimating material requirements
- using tools and equipment in a safe and effective manner
- producing a simple upholstered project by hand and power operations
- inspecting finished product against quality requirements
- minimising wastage of resources, including materials, time and money
- communicating and working effectively and safely with others.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of PPE
- types, characteristics, properties and selection criteria for materials used
- capabilities, limitations and safety requirements of tools and equipment
- matching requirements of fasteners to timbers/materials used
- assembly process in relation to the upholstery product being made.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator
 - have vocational competency in making simple upholstery projects at least to the level being assessed with relevant industry knowledge and experience

- Assessment must occur in a sufficiently rigorous simulated environment that reflects realistic workplace situations.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
