Assessment Requirements for MSFFP2010

Research and draw a basic kitchen or bathroom design

Release: 1

Assessment Requirements for MSFFP2010 Research and draw a basic kitchen or bathroom design

Modification History

Release 1. New unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- following work instructions, procedures and safe work practices
- identifying and interpreting client brief, project sheets, specifications and other relevant information in researching and drawing a basic kitchen or bathroom design
- using manufacturer catalogues and computer operations for internet access and searches
- interpreting the principles of the ‘work triangle’ and how it is applied in kitchen design

OR

- interpreting the principal of functional zones and traffic flows in a bathroom.
- giving examples of good and bad designs of a ‘work triangle’ or bathroom zones
- producing a drawing of the following:
 - a kitchen with at least six (6) cabinets; or
 - a basic bathroom with a minimum of four (4) components
- confirming drawing fits client requirements and brief with appropriate personnel
- modifying drawing as required
- communicating and working effectively and safely with others
- maintaining accurate records.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures in a furniture making environment and use of PPE
- sources of information on kitchen or bathroom components, including catalogues and internet sites
- benefits and disadvantages of overhead cabinets
- ‘work triangle’ concept and how it is applied in kitchen design – note that no leg of the triangle should be less than 1.2 m or more than 2.7 m. The sum of all these sides of the triangle should be between 4 m and 7.9 m.

OR

- concept of bathroom zones and how they apply to bathroom design
- examples of good and bad designs of a ‘work triangle’ or bathroom zones

- free kitchen or bathroom design programs
- drawing equipment and software
- client brief proposals
- recording and reporting procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator
 - have vocational competency in researching and drawing basic designed for kitchens or bathrooms at least to the level being assessed with relevant industry knowledge and experience
- Assessment must occur in a sufficiently rigorous simulated environment that reflects realistic workplace situations.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required to complete the unit.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
