MSFFT4002 Customise stock lines

Release: 1

MSFFT4002 Customise stock lines

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers identifying and clarifying customer and stock requirements; analysing and selecting options; and developing, implementing and testing customisation processes necessary to adapt stock lines to meet the requirements of a furnishing enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Furnishing Technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---------------------|-----|---|
| 1 | Assess requirements | 1.1 | Customer/specification is consulted to determine requirements |
| | | 1.2 | Cost and feasibility of requirements are evaluated and development requirements are explored taking into consideration process, material, quantity, cost and outcome requirements |
| | | 1.3 | Codes, regulations and technical documentation are consulted to establish design limitations, where applicable |
| | | 1.4 | Specialist expertise is consulted as required |
| 2 | Propose options | 2.1 | Options for the use and modification of stock lines are defined and proposed to the customer to determine most appropriate modifications |
| | | 2.2 | Modification of stock lines is considered to take into account production, facility, ergonomic requirements, work |

			health and safety (WHS) and environmental factors
3	Develop modifications to stock lines	3.1	Modifications are developed to meet customer specifications/standards, use and all legislative or regulatory requirements
		3.2	Verification of the development is undertaken in accordance with workplace procedures
4	Coordinate implementation and testing of modifications	4.1	Implementation of modifications is arranged and coordinated
		4.2	Outcome is tested and assessed to establish conformance to requirements
		4.3	Variations to the design are carried out where necessary
		4.4	Documentation is prepared to meet all requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work involves customisation of existing stock lines to satisfy particular site and/or customer requirements
- work is performed with little external assistance and with minimal supervision or direction. The development of modifications may require the assistance and cooperation of others
- work requires individuals to demonstrate conceptual and

- Personal protective equipment includes:**
- analytical ability, discretion, judgement and problem solving skills
 - customers may be internal or external
 - that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- product drawings, prototype, design brief, patterns and specifications
 - machine manufacturer specifications and operational procedures
 - work instructions, including job sheets, cutting lists, plans, drawings and designs
 - workplace procedures relating to reporting and communication
 - manufacturer specifications and operational procedures
 - quality and Australian Standards and procedures

Unit Mapping Information

Supersedes and is equivalent to LMFFT4002B Customise stock lines.
