Assessment Requirements for MSFGG3012 Set up and operate glass mirroring equipment

Release: 1

Assessment Requirements for MSF GG3012 Set up and operate glass mirroring equipment

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Prepare mirroring formulae
- Perform equipment checks and set up and prepare mirroring equipment
- Clean and prepare glass for mirroring
- Apply tinning, mirroring and copper solutions on glass, dry and apply packing paint
- Strip, buff, clean, prepare and re-mirror mirrors
- Handle and store mirrors
- Clean solution tanks, lines, spray guns and equipment after use
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Correct procedures for the planning, preparation, operation and completion of glass mirroring operations
- Work flow requirements in relation to the operation of glass mirroring equipment
- Workplace procedures for the reporting of material, product or equipment faults
- Relevant Australian Standards
- Correct identification, handling and storage requirements for hazardous chemicals
- Characteristics of materials used and uses of products produced by glass mirroring operations
- Workplace safety system requirements related to the operation of glass mirroring equipment

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to glass mirroring equipment, demineralised water, acid, mirroring chemicals, backing paint, workplace operating procedures, unprocessed materials, personal protective equipment and an appropriate work area.
