Assessment Requirements for MSF GG4023

Plan and coordinate complex glazing installations

Release: 1

Assessment Requirements for MSF GG4023 Plan and coordinate complex glazing installations

Modification History

Release 1. Supersedes and is equivalent to MSF GG4016 Plan and coordinate commercial glazing installations. Changes to title, application, elements, performance criteria and assessment requirements.

Performance Evidence

There must be evidence the candidate has completed the tasks in the elements and performance criteria of this unit, and:

- planned and coordinated two complex glazing installations according to contract requirements.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory building and construction codes, standards and government regulations relevant to the installation being undertaken
- glass and glazing industry standards and codes of practice
- complex glazing handling and installation techniques
- certification requirements for glazing installation work performed under regulations or local authority requirements and processes and timeframes for regulatory approvals
- features, formats and inclusions in contract documentation and how to interpret these
- key stakeholders in complex glazing installations and communication and negotiation techniques for establishing and maintaining effective working relationships with them
- potential site requirements and limitations, and how these are managed:
 - access permits
 - access limitations and challenges and impact on work
 - communication protocols
 - delivery processes
 - impact of other building and construction personnel and equipment
 - safety requirements
 - regulatory requirements
- project management and critical path techniques:
 - planning and scheduling
 - documentation
 - monitoring
 - communication
- quality control processes and how these are implemented.

Assessment Conditions

Skills must have been demonstrated in the workplace and at sites where complex glazing is being installed or in a simulated environment that reflects workplace conditions and contingencies.

- use of suitable facilities, equipment and resources, including:
 - a site requiring a complex glazing installation
 - equipment and personnel required for the activities set out in the elements and performance criteria
 - contract documentation for the installation, and industry and workplace quality manuals and procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
