MSFPPF2001 Use picture framing sector hand and power tools

Release: 1

MSFPPF2001 Use picture framing sector hand and power tools

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers using hand and power tools in applications relating to the picture framing sector of the furnishing industry in small, medium and large businesses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Picture Framing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---------------------------------------|-----|--|
| 1 | Identify hand and power tools | 1.1 | Types of hand and power tools and their functions are identified |
| | | 1.2 | Sources of, and access to, power supply are recognised |
| | | 1.3 | Work health and safety (WHS) requirements for using hand and power tools are recognised and implemented |
| 2 | Select and use appropriate hand tools | 2.1 | Hand tools are selected consistent with needs of the job |
| | | 2.2 | Hand tools are checked for serviceability and safety, and any faults reported to supervisor in accordance with enterprise procedures |
| | | 2.3 | Equipment is selected to hold, position or support material for hand tools application, where applicable |

- | | | |
|---|--|--|
| | 2.4 | Material is located and held in position for hand tool application |
| | 2.5 | Hand tools are safely and effectively used according to their intended purpose |
| | 2.6 | Hand tools are safely located when not in immediate use |
| 3 | Select and use appropriate power tools | |
| | 3.1 | Appropriate personal protective equipment is selected, correctly fitted and used |
| | 3.2 | Power tools are selected consistent with needs of job in accordance with conventional work practice |
| | 3.3 | Power tools are visually checked for serviceability and safety in accordance with WHS requirements, and any faults reported to supervisor in accordance with enterprise procedures |
| | 3.4 | Equipment is selected to hold, position or support materials for power tool application, where applicable |
| | 3.5 | Material is located and held in position for power tool application, where applicable |
| | 3.6 | Power tools are safely and effectively used in application processes |
| | 3.7 | Power tools are safely switched and located when not in use |
| 4 | Clean up work area and tools | |
| | 4.1 | All tools are cleaned, maintained and stored |
| | 4.2 | Equipment is cleaned, maintained and stored |
| | 4.3 | Documentation is completed in accordance with enterprise procedures |
| | 4.4 | Work area is cleaned and waste removed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- Unit context includes:**
- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
 - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
 - work requires individuals to demonstrate some discretion, judgement and problem solving
- Hand tools include:**
- hand saws
 - chisels
 - underpinners
 - screwdrivers
 - marking out tools
 - pincers
 - pliers (including stretching pliers)
 - files
 - glass cutters
 - squares
 - measures
 - hammers
 - spirit level
 - guillotine
 - cutting blades
 - clamps
 - needles
 - knives
 - scissors

	• plane • glass pliers • scoring tool • framer's points gun • pressure sensitive adhesive tape dispenser • nail punch • hand-operated mechanical tools, such as the pneumatic V-nailer
Power tools include:	• power saws (circular) • drop saw • docking and mitre • power drills • guillotine • V-nailers • compressor and air guns, including tackers • staplers • flexi point • hand power saw • power screwdriver
Personal protective equipment includes:	• that prescribed under legislation, regulations and enterprise policies: • gloves • safety glasses • gauntlets • footwear • earmuffs • aprons and overalls
Information and procedures include:	• workplace procedures relating to the use of tools and equipment • work instructions, including job sheets, cutting lists, plans, drawings and designs • workplace procedures relating to reporting and communication • manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFPF2001B Use picture framing sector hand and power tools.

Assessment Requirements for MSFPF2001 Use picture framing sector hand and power tools

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Safely and effectively use hand and power tools required by the picture framing sector in performing tasks for which they are to be used
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Work flow within the workplace
- Workplace safety requirements and WHS legislation
- Function and purpose of hand and power tools used in the workplace

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
 - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
 - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.

- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to picture framing hand and power tools, materials used in the manufacturing and/or processing of picture framing products, and operating procedures.
