MSFPT3009 Develop control of tuning hammers

Release: 1

MSFPT3009 Develop control of tuning hammers

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers controlling tuning hammers by moving the tuning pins in very small increments accurately. It applies in workplace and on-site environments for small to large scale enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Piano Technology

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-------------------------------|-----|--|
| 1 | Plan for using tuning hammers | 1.1 | Work health and safety (WHS) requirements, legislative requirements and workplace practices relevant to tuning pianos are verified and complied with |
| | | 1.2 | Communication with others involved with the work is established and maintained to ensure efficient work flow, coordination, personnel cooperation and safety |
| | | 1.3 | Written instructions are followed |
| 2 | Select tools and equipment | 2.1 | Tools and equipment are selected consistent with the needs of the job |
| | | 2.2 | Selected tools and equipment are checked for service ability and safety, and any faults repaired and reported according to workplace practices |
| | | 2.3 | Personal protective equipment is correctly fitted and used |

- | | | | |
|---|-------------------------------|-----|--|
| 3 | Set pin in specified position | 3.1 | Correct posture for tuning is demonstrated which minimises fatigue and promotes muscular control |
| | | 3.2 | Pin is set at desired pitch utilising a pitch standard, within accuracy constraints to + or – 0.5 cents |
| | | 3.3 | Key is struck using stabilising blows |
| | | 3.4 | Coordinated motor and auditory reflexes are demonstrated throughout tuning |
| | | 3.5 | Strings are tuned and stabilised using appropriate techniques |
| 4 | Clean up work area | 4.1 | All tools, materials and other equipment are checked, cleaned and returned to their appropriate location |
| | | 4.2 | Work area is cleared and waste removed |
| | | 4.3 | Workplace documentation is completed and filed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion,

	judgement and problem solving
Tools and equipment include:	• pitch standard • tuning lever/hammer • temperament strip • mutes and wedges • tip wrench • tuning tips and heads
Correct posture includes:	• standing or seated according to type of piano and height of individual • evenly distributing body weight between both feet while standing to reduce fatigue • resting arm where available to aid control during tuning and reduce tiredness
Pitch standards include:	• piano • electronic keyboard • electronic tuning device (ETD) • tuning fork
Hammer techniques include:	• selection of tuning tip and angle • jerking movements • positioning hammer on pin at correct angle to avoid bending of tuning pin
Stabilisation techniques include:	• use of firm key blows in conjunction with placement of pin • calculation of string stretch
Personal protective equipment includes:	• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	• workplace procedures relating to the use of tools and equipment • work instructions, including job sheets, cutting lists, plans, drawings and designs • workplace procedures relating to reporting and communication • manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFPPT3009A Develop control of tuning hammers.
