MSFSF2008 Construct lined curtains and drapes

Release: 1

MSFSF2008 Construct lined curtains and drapes

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers constructing and machine sewing lined curtains and drapes, including detached and sewn-in linings, and may include interlined loose-lined and bag-lined products.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Soft Furnishing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Establish work requirements and prepare for work	1.1	Work health and safety (WHS) requirements, including ergonomic criteria and personal protection needs, are observed throughout the work
		1.2	Work order requirements are checked and confirmed
		1.3	Heading type is recognised to identify personal work requirements for measuring, calculating, sewing, folding and finishing
		1.4	Correct side of fabric, naps, direction of pattern and pattern matches are identified
		1.5	Lining attachment method is recognised to identify any attachments and fasteners, trims and sewing requirements
		1.6	Drapery panels are checked for faults

		1.7	Appropriate needle types for the fabric are selected and threaded
2	Lay out work to be sewn	2.1	Top fabric is folded bringing edges to be seamed together to match any pattern and to maintain an appropriate finished length following workplace quality requirements
		2.2	Linings and any interlining materials are laid out and folded ready for sewing
		2.3	Fabric is held together and, where required, supported with pins or other workplace approved methods
3	Stitch seams and form corners	3.1	Curtain fabrics are held to allow for personal right-hand or left-hand preference of the sewer, and manipulation requirements for the bulk and slipperiness of the materials
		3.2	Linings to be bagged are sewn in place
		3.3	Machine sewing operations are completed correctly
		3.4	Corners are folded and formed to match work order requirements, inserting any required weight bags
		3.5	Hems are completed using any required weights, stitch type and appropriate sewing method
		3.6	Corners are stitched and finished, and any loose threads trimmed
4	Construct curtain headings	4.1	Curtain heading tape is attached according to workplace approved method and job instructions
		4.2	Attached lining and interlinings are sewn into heading
		4.3	Sewn pleat spaces are kept uniform within drops
		4.4	Linings and interlinings are attached to curtain backs by sewing or using appropriate fasteners
		4.5	Care labels are fixed to heading or hem of curtain according to workplace standards
		4.6	Separate linings are sewn using appropriate heading tape and attached to curtain
5	Finish work	5.1	Finished curtain panels, including stitch length, end finishing and final length of finished curtain panels are checked against work requirements

		5.2	Work is pressed for the next work stage
		5.3	Any parts of the work which do not comply with work order are repaired
6	Complete work for next process	6.1	Workplace required documentation is completed and stored following appropriate procedures
		6.2	Finished work is folded, protected and despatched to next process following workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:	• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent • work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements • work requires individuals to demonstrate some discretion, judgement and problem solving
Machines include:	• industrial sewing machines • pressing equipment
Tools and equipment include:	• measuring and calculating equipment: • tapes • rulers • calculators • computers

	• fabric and general cutting and sewing tools: • scissors • sewing machines • hemming machines • overlockers • pleating machines
Materials to be machined include:	• lining • interlining and curtain fabrics • fasteners • threads
Work order requirements include:	• widths and numbers of finished curtain panels, heading style, number and spacing of pleats • finishing and any filling of curtain headings
Marking out includes:	• returns • overlaps • pleats • spaces
Machine sewing operations quality requirements include:	• straight stitching along seam lines from the top to the lower edge of the material or vice versa • securing of beginning and end of threads of the stitching with even and appropriate seam stitch type, length and visibility • seams are flat • the inclusion of care labels and fibre content labels where required • finished components match work requirements
Personal protective equipment includes:	• that prescribed under legislation, regulations and enterprise policies and practices
Information and procedures include:	• workplace procedures relating to the use of tools and equipment • work instructions, including job sheets, cutting lists, plans, drawings and designs • workplace procedures relating to reporting and communication • manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFSF2008B Construct lined curtains/drapes.

Assessment Requirements for MSFSF2008 Construct lined curtains and drapes

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
 - minimise the risk of injury to self or others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Interpret work order to manufacture the required lined curtains and identify materials used and any special sewing requirements for those materials
- Measure accurately and construct at least two (2) different types of lined curtains/drapes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- Identification of workplace standards, equipment and procedures for the sewing operations
- Fabric types, lining and interlining materials, including common faults and inspection procedures
- Prevention strategies for risks to health from lifting, stretching and repetitive actions
- How the design features of the curtains effect constructing the lined curtains

Assessment Conditions

- Assessors must:
 - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to appropriate sewing machine, fabrics, work
