MSFSF2019 Construct padded pelmets

Release: 1

MSFSF2019 Construct padded pelmets

Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

Application

This unit describes the skills and knowledge required to measure, cut and assemble padded pelmets.

Workers with this competency follow established procedures in the soft furnishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Soft Furnishing

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish task requirements and prepare for work	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Identify requirements for measuring, cutting, padding, fixing and finishing to meet task requirements 1.4 Identify type of pelmet and components of pelmet to be padded 1.5 Select tools, devices and materials required to complete task 1.6 Plan work to conform to quality requirements and efficient use of time and to minimise wastage
2. Cut timber and pad pelmet	2.1 Measure, cut and prepare timber components to meet task requirements 2.2 Lay out padding and other materials 2.3 Assemble and attach components using fastenings, tools and equipment to meet task specifications 2.4 Operate tools and equipment in accordance with workplace procedures and work health and safety requirements

3. Finish task	3.1 Monitor work to ensure quality of product and correct finish, operation of any moving parts, and number and fitting of fasteners/brackets 3.2 Identify problems during work operations and report according to workplace procedures 3.3 Minimise waste and collect and store re-usable materials according to workplace procedures 3.4 Perform routine maintenance of tools and equipment according to workplace and manufacturer instructions 3.5 Clean work area according to workplace procedures
4. Complete work for next process	4.1 Package completed pelmets to meet task requirements 4.2 Secure, label and store package according to workplace procedures 4.3 Complete and store required workplace documentation in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF2009 Construct padded pelmets.

Assessment Requirements for MSFSF2019 Construct padded pelmets

Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure, cut and assemble the components of at least 3 different types of padded pelmets to workplace standards.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- characteristics of different types of pelmets
- workplace standards and procedures for construction of padded pelmets
- tools and equipment commonly used to construct padded pelmets, including:
 - measuring and calculating equipment:
 - fabric and general cutting tools:
 - fabric and general assembling tools and materials:
- materials commonly used to construct pelmets:
 - fasteners
 - threads
 - timber
 - adhesives
 - padding material
 - fabric
 - linings and trims
- work health and safety requirements, including personal protective equipment (PPE), ergonomic work practices and manual handling procedures.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- work orders and quality specifications
- cutting and assembly equipment required for performance evidence
- PPE
- fabrics, padding, trims, timber
- workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
