MSFSL3001 Apply product and material knowledge to leadlight and stained glass operations

Release: 1

MSFSL3001 Apply product and material knowledge to leadlight and stained glass operations

Modification History

Release 1 - New unit of competency

Application

This unit of competency covers applying product and material knowledge to leadlight and stained glass operations by identifying types of glass and other materials used in the leadlight and stained glass industry, their characteristics, properties, uses and limitations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Unit Sector

Leadlight and Stained Glass

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify and respond to glass and material properties	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to leadlight and stained glass operations are verified and complied with
		1.2	The types of glass and inherent characteristics are analysed to select the optimum glass for the product
		1.3	The characteristics and properties of leadlight and stained glass are identified and considered
		1.4	The properties and impacts of metals are identified and considered

- | | | | |
|---|--|-----|---|
| 2 | Apply visual evaluation techniques to glass products | 2.1 | Correct visual procedures using natural and artificial light are followed |
| | | 2.2 | Characteristics of glass styles are explained |
| | | 2.3 | Glass is identified according to style |
| | | 2.4 | The quality and style of glass are evaluated ensuring conditions for evaluation are as favourable as possible |
| 3 | Respond to the impact of glass properties | 3.1 | The cause and effects on the age of glass is considered and responded to |
| | | 3.2 | The cause and effects on the glass of structural insecurity is considered and responded to |
| | | 3.3 | The cause and effect of weather extremes are considered and responded to |
| | | 3.4 | Records are maintained according to workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- | | |
|--|--|
| Unit context includes: | <ul style="list-style-type: none">• WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent• work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements• work requires individuals to demonstrate some discretion, judgement and problem solving |
| Types of glass include: | <ul style="list-style-type: none">• clear, translucent and opaque• coloured• stained• textured |
| Metals used in leadlight and stained glass include: | <ul style="list-style-type: none">• lead• copper |
| Glass faults include: | <ul style="list-style-type: none">• venting• cracking• fading• slumping |
| Other faults include: | <ul style="list-style-type: none">• oxidation• breakage• structural insecurity |
| Records and reports include: | <ul style="list-style-type: none">• product type• size• inspection• inspection outcomes• quality outcomes• storage locations |
| Personal protective equipment includes: | <ul style="list-style-type: none">• that prescribed under legislation, regulation and enterprise policies and practices:<ul style="list-style-type: none">• gauntlets• gloves• safety glasses• hard hats |

Information and procedures include:

- safety footwear
- aprons and overalls
- workplace procedures relating to the use of tools and equipment and personal protective equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

Unit Mapping Information

Supersedes and is equivalent to LMFSL3001B Apply product and material knowledge to leadlight and stained glass operations.
