MSMSS00007 Trade Measurement Inspection

Release 2

MSMSS00007 Trade Measurement Inspection

Modification History

Release 2. Correction to unit code listed in Skill Set. Equivalent.

Release 1. Replaces PSPSS00032 Trade Measurement Inspection Skill Set. Not equivalent.

Description

This Skill Set provides an introduction to trade measurement.

Pathways Information

These units from the MSM Manufacturing Training Package provide an introduction to the work of a trade measurement inspector and are likely to be undertaken during the early phase of inspector training, prior to commencing the statutory qualification PSP40516 Certificate IV in Trade Measurement.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

MSMTMINS301	Inspect a range of simple measures
MSMTMINS302	Inspect a range of simple measuring instruments
MSMTMREF301	Use and maintain reference standards
MSMTMVER403	Verify Inspectors' Class reference standards

Target Group

This skill set is for those commencing a career as a trade measurement inspector. It provides the skills and knowledge required to undertake inspections of simple measures and simple measuring instruments used for trade and the verification of Inspectors' Class reference standards. Examples of these instruments include length measures, alcoholic beverage measures, lubricating oil measures, graduated measures, trade masses in the range 1mg to 20kg, beverage measuring instruments, protein measuring instruments, length measuring instruments, area measuring instruments, dimensional measuring instruments, vehicle tanks and milk tanks as well as the auxiliary devices point of sale systems and control systems for liquid-measuring systems (consoles). Examples of Inspectors' Class reference standards are masses, measures of length (rigid and flexible), and volume measures, such as those used to test beverage or fuel dispensers.

Suggested words for Statement of Attainment

These units are taken from MSM Manufacturing Training Package and meet the competency requirements of the National Measurement Institute for an Assistant Trade Measurement Officer.
