**Release 1**

## MSMSS00018 Operate a high pressure water jetting system

### Modification History

Release 1. Supersedes and is equivalent to MSMSS00004 Operate a high pressure water jetting system.

### Description

This skill set reflects the skill requirements to safely and effectively operate a high pressure water jetting system independently. To achieve this skill set, the candidate must have completed 120 hours of supervised work practice as detailed in the Assessment Requirements of the units of competency.

### Pathways Information

These units provide credit towards relevant qualifications in the MSM Manufacturing Training Package.

### Licensing/Regulatory Information

Nil

### Skill Set Requirements

| Unit Code | Unit Title                                   |
|-----------|----------------------------------------------|
| MSMPER200 | Work in accordance with an issued permit     |
| MSMWHS110 | Follow emergency response procedures         |
| MSMWHS200 | Work safely                                  |
| MSMWJ304  | Operate a high pressure water jetting system |

### Target Group

This skill set is for a member of the water jetting team who needs to be competent to operate independently. This not only involves technical competence in high pressure water jetting but also requires safe operation at a worksite that is not familiar to the operator.

## **Suggested words for Statement of Attainment**

These competencies from the MSM Manufacturing Training Package meet the minimum industry requirements for an independent operator undertaking high pressure water jetting.
