Assessment Requirements for MSMWHHS110 Follow emergency response procedures

Release: 1

Assessment Requirements for MSMWHS110 Follow emergency response procedures

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS110A Follow emergency response procedures

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- recognise emergency signals and other communication of an emergency
- identify emergency situations in which there is no mechanical/electronic signal
- follow procedures to:
 - identify the emergency leader
 - take the appropriate action in an emergency
 - report according to procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- emergency, fire and injury procedures
- spill or other loss of containment (LOC) procedures
- communicating methods appropriate to role
- reporting requirements.

Assessment Conditions

Competency must be achieved before performing this work unsupervised. Therefore this unit will typically be assessed off the job. Where assessment is undertaken on the job, appropriate supervision and safety precautions must be provided.

The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.

The collection of performance evidence:

- should provide evidence of the ability to perform over the range of situations which might be expected to be encountered including typical disruptions to normal, smooth work conditions
- will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
- may use industry-based simulation particularly where safety, lack of opportunity or significant cost is an issue.

Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance including environment, task skills, task management skills, contingency management skills and job role environment skills.

On-the-job assessment will typically involve participation in an emergency drill.

Assessment in a simulated environment should use evidence collected from one or more of:

- walk-throughs
- demonstration of skills
- industry-based case studies/scenarios
- ‘what ifs’.

Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.

Foundation skills are integral to competent performance of the unit and should not be assessed separately.

As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.
