Assessment Requirements for MSS017003

Identify and respond to external sustainability factors for an organisation

Release: 1

Assessment Requirements for MSS017003 Identify and respond to external sustainability factors for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS017003A Identify and respond to external sustainability factors for an organisation.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, across an organisation or section/department, to:

- recognise relevant external sustainability factors
- develop appropriate responses to these external factors
- determine which responses proceed
- communicate required responses.

Knowledge Evidence

- Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to identify and respond to external sustainability factors including knowledge of:
 - process and changes which occur at each step in selected value chain
 - principles of sustainability
 - current actual and possible sources of external sustainability factors relevant to the organisation
 - possible responses for improving sustainability
 - root cause analysis
 - hierarchy of hazard control and its application to sustainability hazards
 - relevant legislation, regulation and protocols, government incentives and other initiatives
- risk analysis and its application to sustainability risks.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where factors that influence an organisation and its environment that relate to sustainability are scanned, identified and responded to, for the benefit of the organisation, in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.
