Assessment Requirements for MSS025036 Plan and conduct environmental project work

Release: 1

Assessment Requirements for MSS025036 Plan and conduct environmental project work

Modification History

Release 1. Unit code changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Assessment Requirements changed. Workplace outcome changed. Supersedes and is not equivalent to MSS025023 Plan and conduct environmental project work.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- plan, execute and report on at least one measurement-based environmental project.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- environmental and measurement terms, concepts and principles
- legislative, regulatory and workplace requirements that apply to assigned project activities
- workplace and regulator sampling, monitoring and testing procedures that apply to assigned project activities
- project management principles and tools for project planning and monitoring of timelines, expenditure and performance
- techniques for achieving effective communication, teamwork and cooperation
- techniques for troubleshooting, problem solving and conflict resolution
- workplace project planning, management and reporting requirements
- workplace procedures for identifying and assessing and controlling hazards and risks associated with project activities
- common site hazards and control measures
- health, safety and environment requirements, including first aid safety and survival principles.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - maps and site plans

- organisation, site and/or project background information relevant to proposed project
- site sampling plans and specified sampling and test methods, sampling and testing equipment and equipment manuals
- project management procedures and tools and software modelling of industry operating conditions, including:
 - access to site/s.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
