Assessment Requirements for MSS402086 Use planning software systems in operations

Release: 1

Assessment Requirements for MSS402086 Use planning software systems in operations

Modification History

Release 1. Unit code changed. Application changed. Performance Criteria changed. Foundation Skills populated. Assessment Requirements changed. Supersedes and is equivalent to MSS402083 Use planning software systems in operations.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- access planning software system and enter and retrieve information relevant to own work at least 3 times
- used planning software systems for at least 3 different purposes and applied the outcomes in decision-making.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- planning software system and operation, including:
 - terminal locations and types
 - security and access arrangements
 - information held in planning software relevant to own work
 - data collection methods for operations in work area
 - assistance arrangements for users of planning software
 - business activities exercised with the planning software system
- procedures for recommending improvements
- data and information sources relevant to job role
- adjustments within own scope of responsibility and related procedures.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - functioning planning software system

- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
