Assessment Requirements for MSS404062 Facilitate the use of planning software systems in a work area or team

Release: 1

Assessment Requirements for MSS404062 Facilitate the use of planning software systems in a work area or team

Modification History

Release 1. Unit code changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS404060 Facilitate the use of planning software systems in a work area or team.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- use planning software information to make at least 2 decisions about operations in work area
- identify and act on at least 2 changes that could improve use of planning software including one in each of the following areas:
 - accuracy and/or relevance of information sent to system
 - skills or development needs of team or work group.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- hierarchy of planning software system and operation
- information available from/through the planning software system and relevance to work area
- query facilities and information analysis capabilities offered by planning software
- support, skills or other development mechanisms available for access by team members
- techniques to promote a safe respectful environment for communication and learning.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - functioning planning software system
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
