Assessment Requirements for MSS405033 Optimise office systems to deliver to customer demand

Release: 1

Assessment Requirements for MSS405033 Optimise office systems to deliver to customer demand

Modification History

Release 1. Supersedes and is equivalent to MSS405033A Optimise office systems to deliver to customer demand

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more office work areas or product families, to:

- interpret office processes in terms of customer demand and flow of work
- establish and/or optimise office related levelled pull systems
- motivate others to implement, sustain and improve office related levelled pull systems.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to establish new or improve existing office systems, including knowledge of:

- methods of calculating rates of demand and flow of work (e.g. takt and pitch)
- application to office work of demand signals, such as kanban and electronic demand signal systems
- techniques for achieving a smooth and consistent flow of work
- visual displays.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
 - The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
 - A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
 - Assessment should use a real project where development of a new, or improvement of an existing office system occurs in an operational workplace.
-

-
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
 - Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
 - Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
 - Foundation skills are integral to competent performance of the unit and should not be assessed separately.
 - Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
 - The assessor must demonstrate both technical competency and currency.
 - Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
 - Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.
