MSS407007 Respond to a major non-conformance

Release: 1

MSS407007 Respond to a major non-conformance

Modification History

Release 1. Supersedes and is equivalent to MSS407007A Respond to a major non-conformance

Application

This unit of competency covers the skills and knowledge required to lead a response at a team or area level to a major non-conformance which could have severe business impacts.

The unit can be applied to subsections of an organisation, such as a team, area or department, or in the case of a small or medium sized enterprise (SME), to the whole organisation.

This unit applies to team leaders and people with a similar sphere of influence and scope of authority and responsibility and covers the skills required to respond to a situation where people, processes, equipment or systems fail to meet requirements (there is a major non-conformance) for whatever reason, and this will have significant business consequences. The non-conformance may be anywhere in the value stream, not necessarily in the team, department or area which needs to respond. Many teams, departments or areas may need to respond. However, this unit applies to the skills needed to lead a single team, department or area response.

This unit is not primarily about identification of the cause of the non-conformance but rather about skills for appropriate responses to contain the situation, including not allowing it to accelerate or cascade. It is also about skills to minimise the adverse consequences while doing what can be done at the team, department or area level to remedy the situation.

This unit does not cover the specialist skills required to contain/remediate an emergency non-conformance, such as a fire or explosion. Relevant emergency management skills from other Training Packages should be accessed for these skills.

This unit may be also applied to service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Define extent and nature of non-conformance | 1.1 | Identify target performance prior to non-conformance. |
| | | 1.2 | Determine commencement and expected duration of non-conformance. |
| | | 1.3 | Determine impact of non-conformance on target performance. |
| | | 1.4 | Determine impact of non-conformance on sustainability (ecology, economy and social) performance. |
| | | 1.5 | Determine impact of non-conformance on maintenance performance. |
| | | 1.6 | Liaise with customers to determine minimum acceptable performance during period of non-conformance. |
| | | 1.7 | Define non-conformance in terms of customer requirements and target performance. |
| 2 | Determine priorities and actions | 2.1 | Develop possible responses appropriate to the situation. |
| | | 2.2 | Determine possible timing of possible responses. |
| | | 2.3 | Identify required resources for the responses developed. |
| | | 2.4 | Evaluate possible responses and select or shortlist responses. |

- | | | | |
|---|---|-----|--|
| | | 2.5 | Select responses and obtain necessary approvals. |
| | | 2.6 | Organise resources, as appropriate. |
| 3 | Identify information needs | 3.1 | Determine the information needs of stakeholders. |
| | | 3.2 | Identify the sources of required information. |
| | | 3.3 | Arrange to collect required information. |
| | | 3.4 | Obtain authorisation to disseminate information. |
| | | 3.5 | Report information to stakeholders, as appropriate. |
| 4 | Implement response | 4.1 | Initiate response and establish data and information collection procedures. |
| | | 4.2 | Analyse data and other information as it comes to hand. |
| | | 4.3 | Determine progress of response to achieving required outcomes. |
| | | 4.4 | Modify response, including deployment of resources, as required, to better achieve desired outcomes. |
| 5 | Establish plan to return to normal conformance | 5.1 | Determine root cause of non-conformance and analyse to determine likely preventative measures. |
| | | 5.2 | Develop remedial plan to eliminate root cause. |
| | | 5.3 | Obtain sign-off from process/system owner for planned action. |
| | | 5.4 | Implement remedial plan and establish normal conformance. |
| 6 | Conclude and review response | 6.1 | Conduct a debrief and complete reports as required. |
| | | 6.2 | Evaluate and review response and procedures. |
| | | 6.3 | Evaluate and document effectiveness of the response function and its interaction/communication with |

stakeholders.

- 6.4 Recommend improvements to prevent a recurrence and improve response for other non-conformances.
- 6.5 Communicate reports in accordance with company procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Major non-conformance includes one or more of:

- a failure to receive a delivery
- receiving a delivery which is out of specification
- a failure of the transport system to make deliveries to customers or from suppliers
- a problem in the process which fails to produce product or only produces non-conforming product
- a major incident, such as a fire or loss of containment
- a breakdown of critical plant/equipment
- a commercial or legal problem which affects the ability to produce to requirements
- excessive absences of key personnel due to illness or transport breakdown
- a security situation preventing key personnel from performing their duties and/or deliveries being made
- a major supply shortage or price increase.

Business impacts include one or more of:

- sudden increase in defect rates
- loss of supply of materials or components
- loss or severe restriction of operational capability
- loss of transport from process
- increases in fuel energy costs
- increases in the cost of finance/capital.

Performance includes one or more of:

- production volume
- product quality
- production cost
- sustainability and similar measures as appropriate at the team level.

Response to minimise the impact of the non-conformance on the customer includes one or more of:

- supply from another source
- production from other areas
- agreements for reduced supply
- agreements to accept different quality
- short-term responses to cover immediate situation
- different long and medium-term response
- transition strategies where there are different strategies at different phases of the response.

Timing of responses

- implementation following initial containment/stabilisation of

- include one or more of:**
- situation (e.g. where the non-conformance is a major incident, such as a fire or loss of containment)
 - immediate initiation but delayed implementation (e.g. where the non-conformance is a breakdown of critical plant/equipment which will require repair/replacement before implementation)
 - immediate implementation (e.g. when the non-conformance does not prevent the response from starting or there is an alternative which bypasses the non-conformance).
- Stakeholders include one or more of:**
- work team members
 - value stream members
 - other stakeholders internal and external to the team/organisation who are impacted by the non-conformance.
- Team leader includes one or more of:**
- a person who has a formal, permanent role
 - a person who has an ad hoc role in facilitating the function of a team in a workplace.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS407007A Respond to a major non-conformance
