MSSSS00031 Improve energy usage for a work area

Release: 1

MSSSS00031 Improve energy usage for a work area

Modification History

Release 1. Unit code/s updated. Unit title/s updated. Supersedes and is not equivalent to MSSSS00011 Improve energy usage for a work area.

Description

This Skill Set provides the skills to make energy improvements within a work or process area where energy has been identified as a priority sustainability issue. It is intended to build on technical or operational qualifications or equivalent vocational experience relevant to business operations.

Pathways Information

These units can provide credit towards the MSS40122 Certificate IV in Sustainable Operations. These units may also be applied where other aspects of sustainability are identified as the priority issues in which case a Statement of Attainment will be issued instead of the Skill Set.

Licensing/Regulatory Information

Nil

Skill Set Requirements

Unit Code	Unit Title
MSS014016	Evaluate sustainability impact from a work area or process
MSS014020	Optimise sustainability performance of a work area or process

Target Group

This Skill Set targets those who need to measure and calculate the energy consumption of an organisation or part of its value chain in order to determine priority areas for activity that will increase sustainability.

Suggested words for Statement of Attainment

These competencies from the MSS Sustainability Training Package meet the minimum industry requirements for improving energy usage for a work area.
