Assessment Requirements for MSTAT4017

Use garment sizing systems

Release: 1

Assessment Requirements for MSTAT4017 Use garment sizing systems

Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria simplified with Element 1 removed. Foundation Skills field populated. Range of Conditions removed with relevant information moved to Knowledge Evidence. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is equivalent to MSTFD4018 Use and apply sizing systems appropriate for fashion design.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- complete each of the following for at least two garments, each with a different sizing system:
 - analyse body measurements and body characteristics and their effect on sizing
 - take necessary body measurements and record distinctive body characteristics
 - analyse sizing requirements and identify appropriate size range for the design
 - develop size chart.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sizing systems for different body types
 - how different sizing systems are used in businesses
 - types of body measurements required in relation to sizing, including:
 - height and weight
 - body reference points
 - levels
 - girth measurements
 - horizontal measurements
 - vertical measurements
 - cup size
 - seat prominence
 - knee
 - instep
 - posture
 - body characteristics and their effect on sizing:
-

-
- genetic, developmental and structural influences
 - shape classifications, such as hourglass, rectangular, pear and inverted triangle
 - anthropometric classifications (somatotypes)
 - shoulder slope (raised, normal and sloping)
 - body sway and postural asymmetry (according to lower and upper body)
 - proportions (tall, short or average, short or long-waisted, and mid-body shortness)
 - recording and reporting practices.
 -

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - design specifications
 - sizing system information
 - digital technology for size chart creation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
