Assessment Requirements for MSTAT5002

Progress garment design concepts to production

Release: 1

Assessment Requirements for MSTAT5002 Progress garment design concepts to production

Modification History

Release 1. Unit Code, Title and Application changed. Title changed for clarity. Content reworked to flow from MSTAT5001 rather duplicate content of that unit. Elements 1 and 2 removed with some content transferred to MSTAT5001. Foundation Skills field populated. Range of Conditions removed. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is not equivalent to MSTFD5017 Apply design studio processes to meet client brief.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- progress design concepts for at least three different garments or a small range (of at least two items) to production, with work to include:
 - production preparation, including:
 - identifying and documenting all components required for production
 - identifying and documenting technical aspects of production
 - completing specifications to guide production
 - identifying and sourcing resources and production requirements
 - developing production plan to guide production
 - documented evaluation of at least two different aspects of design and two different aspects of production
 - one presentation of finished product(s) to client.
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- garment production planning and implementation, including:
 - processes and sequencing for patternmaking and construction
 - detailed design specifications on which production is based and their key inclusions
 - resources
 - personnel involved
- design and production evaluation techniques
- tools and techniques for communicating and presenting final products.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - design concepts on which production is based
 - information technology for production planning and presentations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
