Assessment Requirements for MSTAT5005

Design bras or swimwear

Release: 1

Assessment Requirements for MSTAT5005 Design bras or swimwear

Modification History

Release 1. Unit Code and Application changed. Prerequisite units removed. Element 1 removed and all elements and Performance Criteria updated to be more consistent with other design units. Foundation Skills field populated. Range of Conditions removed with relevant information moved to Knowledge Evidence. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is not equivalent to MSTFD5001 Design bras and swimwear.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- develop and present at least two bra or swimwear design concepts in response to a brief, with designs to collectively include:
 - designs targeted at two different groups or specialised needs
 - use of two of the following fabric types:
 - one-way stretch
 - two-way stretch
 - no stretch.
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of quality design in the bra or swimwear industry
- local and global trends in bra and swimwear design and construction
- key aspects of body science that impact bra and swimwear design
- components of structured garments and specific considerations for design, including:
 - styling features relating to health effects of bra and swimwear construction
 - bra and swimwear structure for special client groups, including maternity, mastectomy, junior and costume wear
 - sports and fuller figure bras or swimwear and the need for extra support
 - use of specialist materials and trims
- budgetary considerations specific to bra and swimwear design
- characteristics of one-way, two-way and no-stretch fabrics
- current practices and special construction methods for bras or swimwear with structured foundations, including:

- fusing
- bonding
- moulding
- sewing requirements
- seam allowances
- stitch requirements
- seam finishes
- tools and techniques for presenting design concepts.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - design briefs
 - information technology for research and communication
 - fabrics and materials for testing and experimentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
