MSTAT6007 Perform advanced draping

Release: 1

MSTAT6007 Perform advanced draping

Modification History

Release 1. Unit Code, Title and Application changed. Prerequisite units removed. Elements and Performance Criteria simplified with Element 1 removed. Foundation Skills field populated. Range of Conditions removed. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is not equivalent to MSTFD6005 Drape structured over-garments.

Application

This unit describes the skills and knowledge required to perform advanced draping for innovative or structured garments such as evening wear, bridal, occasion wear and tailored garments. Draping may be for a one-off garment that goes from drape to garment, or a prototype that goes from drape to flat pattern for small volume production. Draping is performed on a body form, such as a mannequin or model.

This unit applies to individuals working in design and production roles.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Apparel and Textile Production

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for draping	1.1 Select and prepare draping tools and equipment based on design specifications 1.2 Prepare mannequin or model by applying required padding 1.3 Mark body reference points with tape in correct positions on body form 1.4 Plot design lines from working drawings onto body form, using narrow tape

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.5 Develop working drawings and check measurements for accuracy
2. Plan drape	2.1 Prepare fabric for draping according to fabric characteristics and garment design 2.2 Identify requirements for adding ease and for manipulating dart excess 2.3 Plan seam position and develop drape plan based on design requirements
3. Complete drape	3.1 Pin fabric on body form, relating reference points and fabric grains 3.2 Perform sequential advanced draping operations to achieve required outcomes 3.3 Remove drape from model 3.4 Finalise drape and direct to next production process

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret garment design specifications
- Numeracy skills to work concepts of measurement and proportion.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for MSTAT6007 Perform advanced draping

Modification History

Release 1. Unit Code, Title and Application changed. Prerequisite units removed. Elements and Performance Criteria simplified with Element 1 removed. Foundation Skills field populated. Range of Conditions removed. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is not equivalent to MSTFD6005 Drape structured over-garments.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- perform sequential advanced draping operations for one of the following:
 - a one-off garment that goes from drape to garment
 - a prototype that goes from drape to flat pattern for small volume production.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- principles and concepts of patternmaking
- customer and workplace requirements
- cost efficiency in relation to draping
- range of typical garment fabrics, including weight and other characteristics
- partial flat pattern construction or blocks to complement the drape, including the development of sleeves and collars
- design schematics:
 - the design lines as depicted in the fashion illustration
 - design lines transferred onto the dress form using narrow tape
- cutting and garment construction
- draping tools and equipment
- recording and reporting practices.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - design specifications

- model on which fabric is draped
- fabric for draping
- draping tools and equipment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
