Assessment Requirements for MSTCL2013 Block and shape headwear by machine

Release: 1

Assessment Requirements for MSTCL2013 Block and shape headwear by machine

Modification History

Release 1. Supersedes and is equivalent to LMTCL2013B Block and shape headwear by machine

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting design specifications
- preparing and handling materials
- manipulating materials to produce required shapes for at least two (2) types of headwear
- using blocks according to specifications
- operating machines or equipment used in shaping headwear
- recognising and rectifying non-conforming outcomes
- documenting process and outcomes according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- textiles and millinery foundation materials and their composition, and the effects of temperature and steam
- the stretch quality of fabrics
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in blocking and shaping headwear by machine, at least to the level being assessed, with relevant industry knowledge and experience.

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
