Assessment Requirements for MSTDC3002 Dry clean garments with special treatment requirements

Release: 1

Assessment Requirements for MSTDC3002 Dry clean garments with special treatment requirements

Modification History

Release 1. Supersedes and is equivalent to LMTDC3002A Dry clean garments with special treatment requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, include:

- reading and following work instructions, standard operating procedures and safe work practices
- determining cleaning requirements for at least five (5) different types of complex garments
- using and handling additives and chemicals safely
- preparing machine and solvents for dry cleaning, conduct spotting, and selecting program for garment requirements
- selecting and monitoring additive dispensing and dosing system, where relevant
- operating and monitoring machine in accordance with operating instructions and workplace procedures, for at least five (5) special or complex garments
- unloading garment using correct manual handling techniques, inspect for stains or further work, and complete records
- monitoring and completing dry cleaning operation and inspecting articles to maintain quality requirements
- documenting, assessing and reporting faults
- completing documentation and preparing garment for customer to collect.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards that govern dry cleaning and laundry operations
- cleaning requirements of special fibres and fabrics
- handling and cleaning procedures for complex garments, such as:
 - wedding gowns
 - vintage clothes
 - leather
 - suede
 - other garments that require special treatment and handling
- machine operation, program selection, and monitoring procedures for complex garments

- use of solvents for complex garments:
 - perchlorethylene
 - white spirit
 - hydrocarbons
- environmental aspects related to workplace, and machine or equipment operation and manual handling, including consumable or hazardous materials
- quality practices
- workplace practices
- effective communication
- practices for recording and reporting.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in conducting safe handling of dry cleaning chemicals and solvents, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.
