**Release: 1**

# MSTFD2005 Identify design process for fashion designs

## Modification History

Release 1. Supersedes and is equivalent to LMTFD2005B Identify design process for fashion designs

## Application

This unit of competency covers the skills and knowledge required to identify design process for fashion designs.

The unit of competency applies to identifying the criteria for a fashion design brief, and how they impact on the process of producing fashion items. It includes the impact of colour on the design process in a production environment.

Work is conducted according to defined procedures, in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Fashion design and technology

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

|   |                                   |     |                                                                             |
|---|-----------------------------------|-----|-----------------------------------------------------------------------------|
| 1 | <b>Determine job requirements</b> | 1.1 | Follow standard operating procedures (SOPs)                                 |
|   |                                   | 1.2 | comply with work health and safety (WHS) requirements at all times          |
|   |                                   | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
|   |                                   | 1.4 | Determine job requirements from specifications, job                         |

sheets or work instructions

- |   |                                           |     |                                                                                                                     |
|---|-------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------|
| 2 | <b>Prepare for fashion design process</b> | 2.1 | Identify the elements and principles of fashion design                                                              |
|   |                                           | 2.2 | Identify the criteria of an identified fashion design brief                                                         |
|   |                                           | 2.3 | Investigate colour dimensions and colour combinations for fabrics, accessories and components                       |
|   |                                           | 2.4 | Identify commercial considerations in producing a design                                                            |
|   |                                           | 2.5 | Prepare tools, equipment and work space                                                                             |
|   |                                           |     |                                                                                                                     |
| 3 | <b>Prepare colour design</b>              | 3.1 | Identify relationship between value and intensity and prepare a colour chart for a design brief                     |
|   |                                           | 3.2 | Use appropriate tools and equipment to prepare a colour wheel and shade scale according to colour mixing principles |
|   |                                           | 3.3 | Colour match all garment components with identified fabric to prepare colour design for production                  |
|   |                                           |     |                                                                                                                     |
| 4 | <b>Review colour design</b>               | 4.1 | Check that colour charts satisfy specifications and quality criteria                                                |
|   |                                           | 4.2 | Carry out any changes or adjustments as required                                                                    |
|   |                                           | 4.3 | Document and record design                                                                                          |

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- PPE
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS requirements

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Criteria for a fashion design brief include three or more of the following:**

- subject matter/garment
- style
- effects
- colour
- size
- fabric
- quantity
- timeframe

**Tools and equipment include one of more of the following:**

- digital equipment
- software
- fabrics
- hand tools
- pencils, crayons, pens, brushes and paints
- paper and cardboard
