Assessment Requirements for MSTFD4020 Use electronic fashion design tools

Release: 1

Assessment Requirements for MSTFD4020 Use electronic fashion design tools

Modification History

Release 1. Supersedes and is equivalent to LMTFD4020B Use electronic fashion design tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- identifying requirements for at least two (2) garments or products
- selecting appropriate software program
- using design programs and equipment to create designs, patterns and production specifications for at least two (2) garments
- testing designs, patterns or production specifications and modifying, as required
- assessing outputs generated using electronic design programs against specifications of design brief
- seeking feedback from appropriate people and making adjustments, as required
- creating final products and protecting, organising and storing them according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- work instructions, SOPs and safe work practices
- relevant Australian Standards
- principles of design
- electronic equipment and program features
- editing tools and procedures
- operating procedures
- garment production requirements
- design specifications:
 - visual content and presentation
 - style details
 - fabric types and quantities
 - production requirements
 - special effects or features
 - quality criteria

- finishing details
- sizing
- designs, patterns and production requirements
- quality standards
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in electronic fashion design, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
