Assessment Requirements for MSTFD6005 Drape structured over-garments

Release: 1

Assessment Requirements for MSTFD6005 Drape structured over-garments

Modification History

Release 1. Supersedes and is equivalent to LMTFD6005B Drape structured over-garments

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs) and safe work practices
- applying relevant standards
- plotting design lines from working drawings onto body form, using narrow tape, developing working drawings and checking measurements
- preparing fabric for draping, identifying requirements for adding ease and for manipulating dart excess
- planning seam position and developing drape plan
- pinning fabric on body, relating reference points and fabric grains and performing sequential structured draping operations for a one-off garment that goes from drape to garment, and a prototype that goes from drape to flat pattern for small volume production
- removing drape from model, consulting with appropriate personnel as required and ensuring quality work practices
- finalising drape and directing to next production process.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards for patterns and garment construction
- principles and concepts of patternmaking
- customer and workplace requirements
- cost efficiency in relation to patternmaking
- range of typical garment fabrics, including weight and other characteristics
- partial flat pattern construction or blocks to complement the drape, such as with the development of sleeves and collars
- design schematics:
 - the design lines as depicted in the fashion illustration
 - design lines transferred onto the dress form using narrow tape
- marker making procedures
- cutting and garment construction

- draping tools and equipment:
 - body form
 - narrow tape
 - shoulder pads
 - tape measure
 - pen/pencil
 - scissors
 - square rule
 - marker pens
 - hole punch
 - pins
 - fashion triangle
 - French curve
 - pattern notcher
 - weights
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in structured draping, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
